

Quy Nhon, June 04th, 2024

INVITATION FOR BID

Pursuant to Decision No. 1958/QD-UBND dated June 01, 2024 of Binh Dinh Provincial People's Committee on approving bidding documents to select investors for the implementation of the Project: Long My Domestic Solid Waste Treatment Plant using waste incineration technology combined with electricity generation;

Quy Nhon City People's Committee (Procuring entity) announces the invitation for bid to select investors for the implementation of Long My domestic solid waste treatment plant project using waste incineration technology combined with electricity generation following these contents:

<i>Procuring entity</i>	People's Committee of Quy Nhon city
<i>Address of Procuring entity</i>	30 Nguyen Hue street, Le Loi ward, Quy Nhon city
<i>Main content of the project</i>	<p>a) Name of the project; Investment objectives and investment scale of the project</p> <ul style="list-style-type: none">- Name of the project: Long My Domestic Solid Waste Treatment Plant using waste incineration technology combined with electricity generation.- Objectives and capacities: Thorough treatment for domestic solid waste (and normal industrial waste if it is needed by investors) with waste incineration technology combined to electricity generation; Secondary waste (ash and slag) after treatment will be reused and recycled, contributing to reducing waste landfilling, improving the environment, ensuring the community health and sustainable urban development. The factory construction is required to use advanced and modern technology, thoroughly treat odors, ash, dust and is not required the waste classification at source; Machinery, equipment, and processing lines must ensure new investment, unused status.- Investment scale:+ Design capacity: 500 tons of domestic solid waste/day and

night (and normal industrial solid waste if it is needed by investors) combined with electricity generation in an appropriate capacity to the Implementation plan for the Power Development Plan – VIII of Vietnam.

+ Service scope: Quy Nhon city, An Nhon town, Tuy Phuoc district and Canh Vinh commune, Van Canh district. In a long term, it will increase the volume of household solid waste based on actual needs and expand the scope of service according to the Solid Waste Management Plan of Binh Dinh province for the period 2023-2025, orientation to 2030 and Master Plan of Binh Dinh province for the period 2021-2030, vision to 2050.

+ Technology: Waste incineration technology combined with electricity generation.

+ Services provided: Domestic solid waste treatment. For ordinary industrial solid waste (if any), investors must comply with contracts agreed to waste source owners according to legal regulations.

b) Total investment capital of the project: *minimum 1,500,000,000,000 VND (In words: one thousand five hundred billion Vietnam dong)*

- Preliminary total cost of project implementation: *1,500,000,000,000 VND (In words: one thousand five hundred billion Vietnam dong)*

- Other costs according to regulations of law on industry and field management (if any): None.

- Compensation, support, and resettlement costs (if any): 0 VND (Quy Nhon City People's Committee will carry out site clearance for areas A5 and A6, organize investment in technical infrastructure up to the fence of the project according to Notice No. 328/TB-UBND dated August 31, 2023 of the Provincial People's Committee).

c) Project implementation location: at plot A5 and plot A6 in Long My solid waste treatment area, Phuoc My commune, Quy Nhon city.

d) Land use purpose; Current land use status (if any):

- Land use purpose: Construction of Long My domestic solid waste treatment plant using waste incineration technology combined with electricity generation. Combining waste burning to generate electricity together with education and

	<p>model tourism.</p> <ul style="list-style-type: none"> - Current land use status: Including cleared land, land for plating acacia; with an area of about 5 hectares of cleared site, the remaining 5 hectares are being assigned to individuals for use. The land location has a relatively low current elevation. The base elevation of the area is not uniform, ranging from +30.00m to +63.00m. Quy Nhon City People's Committee will carry out site clearance in areas A5 and A6, organize investment in technical infrastructure to the project's fence according to Notice No. 328/TB-UBND dated August 31, 2023 of the People's Committee of Binh Dinh province. <p>dd) Area of land for project implementation: Land area expected to be used is about 100,401 m² (This area is determined on the basis of land use boundaries according to planning and may change due to related issues of safety corridors and other requirements of construction components, but it does not include the land area for the factory's connection line to the National electricity system and the connecting transportation system. For flined ash treatment location, it will be carried out according to regulations and investors' proposals); Priority will be given to investors who propose economical use of land.</p> <p>e) Planning targets: According to the detailed construction planning at a scale of 1/500 of Long My solid waste treatment area, Phuoc My commune, Quy Nhon city which has been approved and adjusted by the Provincial People's Committee in Decision No. 3534/QD-UBND, dated September 25, 2023.</p> <p>g) Project operational term and implementation progress:</p> <ul style="list-style-type: none"> - Operational term of the project: 30 years, from the date of investor selection results or approval as the investor to implement the project. - Project implementation progress: no more than 2 years (24 months) from the date of investor selection results or approval as the investor to implement the project.
<i>Form of investor selection</i>	Open bidding
<i>Method of selecting investors</i>	One bag of documents for each stage
<i>Time to issue</i>	From 7:00 a.m. on June 10, 2024 to 2:00 p.m. on August 09,
